The strength of 7th house is very important business and its prospects. In your horoscope, Capricorn rises over 7th house owned by Saturn. As per KP, the sub Lord of 7th house is Venus and she is full detail in 9th house in own star and sub division of Venus was powerfully aspected by Saturn also indicates delay and uncertainty regarding business in some periods.

Presently you are under moon–Saturn period till June 2017. Later moon–Mercury period will rule till November 2018. Placement of moon in the star of Ketu, a representative for Jupiter in 4th house is justifying real estate business. The influence of Saturn might be the reason for some delay in building opportunities. You will surely have better contracts during this period of Mercury. As Mercury is a dual planet you will construct apartments or townships.

During moon–Ketu period from November 2018 onwards you will enjoy credit availability. There will be free flow of income and overdraft facilities throughout this period. You will initiate new projects related the support of others during the year 2019. There may be satisfactory returns for your efforts.

Moon–Venus period that rules between June 2019 and February 2021 is the consolidation base. There will be

significant growth in business activities. You may tie up knots with different new companies as a project of sharing set up. You will surely reach new heights with good support during this period. It seems to me that only real estate or construction business is suitable for you throughout moon major period. Your efforts to start new business line may not be fruitful for obvious reasons.

However you may try some mediumship activities or commission based operations between June 2017 and November 2018. Ultimately construction period will be the best course of action. One need not worry about future prospects considering the present phase. After June you will surely find better ways of making money in real estate business.

To increase business, it may be a better option to share the project with some other builders. That means you can complete the construction by tailoring services of different people or on contract basis. That may reduce pressure on fund requirements and completion of projects within the estimated time. You should immediately set up discussions or meetings with people having prospect to business plans. You will need to dynamic thinking rather than conventional construction business outlook.

The following remedies may be helpful for peace of mind and better thinking:
